Subject: RE: Invenenergy Facility in Allegheny County

Hi Tim, Thanks for your reply. I'm trying to triage my work priorities right now (at least for the next couple of weeks or so) so I will pass on this call. Anything not AZR or case by case RACT is not my list right now. But thanks for keeping me in the loop. Cynthia

Subject: Invenenergy Facility in Allegheny County

Cynthia,

Just checked voicemail and got your message. It's a new facility and I think Amy may be on the call. Shaun thought that it would be a month or so before they officially submitted the project for public comment. I'll probably be discussing their modeling protocol but they initially asked about our modeling guidance for secondary ozone and PM-2.5 formation. It's actually not a big plant; just a single gas turbine with a heat-recovery steam generator. I saw you initially declined the invite but kept you on since I switched the conference line and invited Jessica if she's available. I'll be back in the office tomorrow. I can stop over quick if you're in.
